

Finding Science Guide Book Documents

Science guide information for both the Learning Coach and Student are found in the “Lesson Resources” button in the bottom left hand corner of the lesson.

**Please note, that the student should always be working in his/her own account – when they are working in the student account, “Learning Coach” and “Teacher” guides will not be available to them. They should only see the “Student Guide” documents.*

Example:

The screenshot shows a lesson page titled "Unit 1 Lesson 2: Work". The main text describes work in various contexts and asks for a scientific definition. A sidebar on the left contains navigation options: Close Lesson, Lesson Navigator, Print, Feedback, and Help. Below the text is a menu with items: Keywords, Links, Media, Materials, Lesson Credits, Lesson Objectives, and Activity List. At the bottom, there are buttons for Lesson Resources, Advance Preparation, and Safety. A callout box labeled "Click here first." points to the "Materials" menu item. Another callout box labeled "Click here second." points to the "Lesson Resources" button.

The screenshot shows a "Resources" window with a dropdown menu set to "Materials". Under the heading "Lesson 2: Work", there are three document links: "Learning Coach Guide", "Student Guide", and "Teacher Guide". The "Student Guide" link is circled in red. A callout box labeled "Student guide is downloaded here." points to the circled link. Below this, under the heading "REVIEW: Work", there are two more document links: "Work Review" and "Work Review Answer Key".
